Calling Unit

Mobile calling unit (Premium feature)

- LCD display shows token number and counter / OPD room number or name.
- Supports voice and non-voice announcements as an alert.
- Well-suited for hospitals, banks, diagnostic centers, financial institutions and other high-traffic service environments requiring dynamic queue control.
- Provides a centralized dashboard with call logs, timelines, and performance data for monitoring and analysis.
- Token dispenser can be selected from the various models below depending upon the customer requirement.

Printer

Wall-Mount Printer

Table Top Kiosk

Floor-mount Kiosk

Note: The wireless queue management system operates on a self-generated Wi-Fi network and does not require internet connectivity or access to hospital's any existing network.

Token Journey Analytics

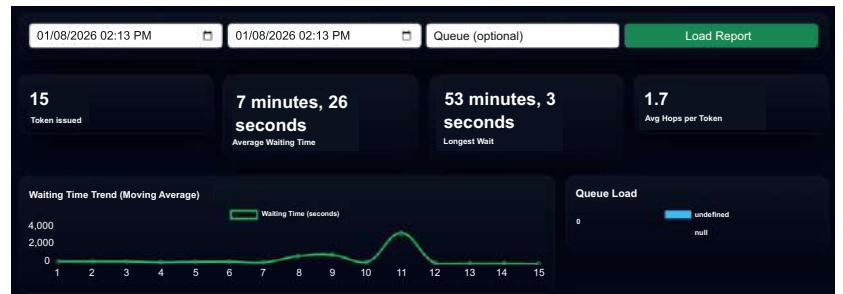

Visual tracking of how tokens move through the system

From: 01/09/2026 To: 01/09/2026

Buttons: Load Data, Download csv

Token	Queue	Issued Date	Issued Time	Last Call Time	Total Wait	Hops	Last Counter
1	null	09/01/2026	12:10:47 PM	12:15:00 PM	4 Minutes, 13 seconds	2	Counter 3
2	null	09/01/2026	12:12:00 PM	12:16:19 PM	4 Minutes, 19 seconds	2	Counter 1
3	null	09/01/2026	12:12:31 PM	12:16:37 PM	4 Minutes, 6 seconds	2	Counter 2
4	null	09/01/2026	12:20:03 PM	12:22:44 PM	2 Minutes, 40 seconds	2	Counter 4
5	null	09/01/2026	12:20:11 PM	12:23:36 PM	3 Minutes, 26 seconds	2	Counter 2
